

In partnership with LIFE (Literacy Integration and Formal Education Foundation), a non-governmental, non-profit Nigerian organization, PREZICON has patronized the renovation and equipping of K.Bukola Fowowe Memorial Orphanage, a Lagos State residential facility catering for toddlers and children under 7 years.

During first Prezicon's visit in November 2020, our team realized that this orphanage didn't have clean water, only few hours of electricity per day, no air conditioning, defective fans, leak in their roof leading to water entering the orphanage during rainy season and poor state of most of the cupboards in the kitchen and bedrooms.

Prezicon's team then installed:

- ✓ A new water treatment plan: the orphanage can then use tap water every day.
- ✓ Solar electricity panels so that Orphanage can use the fans to cool down temperature inside the children's bedrooms and have light whenever they need.
- ✓ Leak in the roof had been fixed.
- ✓ 2 air conditioners have been purchased, as well as kitchen's furniture such as fridge, deep freezer, gas cooker...
- ✓ Cupboard have been fixed.
- ✓ Repainting of the orphanage.

We are persuaded that these renovation works will help Mrs Titilola Omole, Matron of K.Bukola Fowowe Memorial Orphanage to work in better condition with her team and give to these toddlers and children the minimum wellness pending their integration into loving families.

Inauguration of these works happened on the 25<sup>th</sup> March 2021 in presence of LIFE, PREZICON and Mrs Titilola Omole and her team.
